Company policy / Supply chain information

Dear Sirs,

We hereby declare that we are committed to the responsible use of the natural product wood. We always act according to the laws and regulations of sustainable forest management and only use timber that has been harvested legally in regions that are acceptable from a political and forestry point of view.

We never trade with timber from natural forest that has been converted to plantations or for non-forest usage, or from forests where genetically modified trees have been planted. Similarly, we never use wood that comes from regions where civil rights are violated or from forest areas which are threatened or have a high conservation value. It goes without saying that we never deal with illegally harvested wood.

We hereby confirm to provide the botanical name, the country of origin and country of harvest of all items on the shipping documents and invoice – in full compliance with the EU trading regulation for wood and wood-based materials EUTR which came into force on 01.03.2013.

Best regards,

SR-Furniere Vertriebs GmbH
